

# Secure your mailroom from the inside out.

U.S. Messenger's UV-C sterilization device kills over 99% of **viruses, bacteria, and germs** found on your incoming parcels.

## We are committed to your tenants' health and safety.

U.S. Messenger, a leading delivery and messenger intercept provider in the Midwest, now offers UV-C parcel sterilization as part of our supply chain support services. From single-firm mailrooms to building-wide intercept coverage, UV-C parcel sterilization is a crucial safety enhancement to your office, campus, or facility.

Our UV-C sanitation devices contain powerful ultraviolet germicidal lights that will disinfect your packages in 30 seconds or less.

Our experienced personnel are experts in UV-C operation and safety procedures and can provide training to your staff members. **It is powerful enough for hospitals, yet safe enough for your incoming parcels.**

## Focus on your core business operations—not the pathogens in your mailroom.
